Experienced software engineer with a strong focus on backend development using Node.js. Skilled in building robust, scalable server-side solutions that power efficient web applications. I specialize in developing APIs, optimizing database performance, and ensuring secure, reliable infrastructures. I excel in collaborative environments, bringing expertise in backend architecture to deliver seamless, high-performance applications.

WORK EXPERIENCES

Backend Developer   Yogyakarta, Indonesia
Era Solusi Data   Intrenship | Jully 2024 – Present

Era Solusi Data focuses on the delivery of effective data-driven solutions through its software house. We pride ourselves on delivering competitive software with API integrations, which empower your business to ease its workflows and access optimized solutions from within a centralized dashboard.

Responsibilities:
- Designed and implemented a properly documented API for library management, supporting multiple roles and maintaining a neat and consistent database structure.
- Worked in team collaboration for the purpose of scalability and efficiency in solutions, with smooth interaction on the users' end.
- Conducted code reviews for quality, following best practices that supported the development process at large.

EDUCATION

SMK Muhammadiyah 1   Yogyakarta, Indonesia
Bachelor of Engineering, GPA 3,14   2022 - 2025
Major in Software Engineering
